

Let's see how much you can remember about the information you've just heard.

Fill in the blanks with the following words:

**sperm | egg | sexual intercourse | months | fallopian tubes**

**uterus | love | physical | life | penis | vagina**

1. A baby is made when a male \_\_\_\_\_ cell and female \_\_\_\_\_ come together.
2. The way the male sperm cell meets the female egg is through a process called \_\_\_\_\_. This is when the erect \_\_\_\_\_ enters the female \_\_\_\_\_.
3. The male sperm cell fertilises the female egg in the woman's \_\_\_\_\_ and travels down to embed in the lining of the \_\_\_\_\_, where it grows into a baby. The baby grows there in a safe place for 9 \_\_\_\_\_ before it is born.
4. Sexual intercourse is one way that married couples show their \_\_\_\_\_ for one another. It is a \_\_\_\_\_ connection that has the ability to bring about love and \_\_\_\_\_ (in the form of a baby).
